Made Clean. Built Green. Safe for Every Home.

Deko Extreme Flex is designed with health and sustainability in mind – from non-toxic, formaldehyde-free materials to recyclable components. It's flooring you can trust for family living and future generations.

Formaldehyde-Free

No Heavy Metals

Low VOC

Recyclable Core

Meets International Eco Standards

Certified peace of mind - tested to meet European & NZ standards for indoor air quality and material safety.

FlexCore™ Technology

Built to Bend. Engineered to Last.

Real floors aren't perfect. That's why we built FlexCore™. A next-generation core layer engineered to handle the stress, curves, and chaos of everyday homes. From saving you floor prep costs to preventing joint damage over time, FlexCore™ is how smarter floors stay stronger, longer.

Saves You Money

FlexCore™ adapts to subfloors with up to 8mm variation

Reduces or eliminates costly levelling and grinding

Speeds up renovation timelines

Ideal for DIY and trade installs

Won't Crack Under Pressure

Traditional SPC is stiff stress cracks the joints over time

FlexCore™ bends with pressure, reducing breakage risk

Great for high-traffic areas and tight doorways

Less long-term movement = fewer repairs

Protected from Below

Co-extruded waterproof backing film

No glue = no breakdown or delamination

Blocks moisture from slab or concrete base

Adds structure strength and long-term resilience

 **100% Waterproof**

Spills? Wet shoes? Laundry leaks? No worries.

Every plank is fully waterproof from top to bottom perfect for kitchens, bathrooms, rentals, and real life.

No nasties. Just clean air, safe floors, and peace of mind.

Formaldehyde-free, low-VOC, and recyclable Deko Flex is safe for families, pets, and the planet.

Easy DIY Install

Clicks fast. Stays tight. No glue, no nails, no drama.

Whether you're a weekend DIYer or a busy tradie, Deko Flex clicks together with Unilin® locks to save you time and labour.

Safe & Sustainable

Takes pressure without cracking under it.

FlexCore™ gives each plank flexibility under stress so locks last longer and floors stay flatter in busy homes.
