

DEKO NATURAL

Premium timber character, engineered for real life.
Natural warmth, grain you can feel and a more substantial presence
underfoot.

Shown in DNC105 Natural Oak
Premium EIR Carbon-Infused SPC Flooring

A natural sense of calm.

Deko Natural softens a room with timber warmth, grain you can see and texture you can feel. Across living spaces and connected areas, it creates a calmer material foundation refined without asking the home to become precious.

Warmth without heaviness

Natural tones soften the room while keeping the space open.

A quieter material foundation

Timber character gives furniture, light and architecture room to breathe.

Refined for real homes

A premium finish made to live with, not work around.

SURFACE & CORE

The character of
timber, brought into
focus.

Deko Natural pairs grain aligned EIR texture with a carbon-infused SPC core, so the premium difference is visible above and engineered beneath. Knots and grain lines gain tactile definition, while 5S U Guard gives the surface high resistance to staining, fading, UV exposure and common marks. Together, the construction brings depth up close and dimensional stability through daily life.

Eleven expressions of timber character.

From pale, light catching finishes to balanced oaks, honeyed warmth and deeper character tones, Deko Natural offers eleven distinct directions without losing its sense of cohesion. The palette is broad enough to personalise a home, yet edited enough to make comparison feel clear.

Light & Airy:

Pale, easy going tones that brighten a room and soften the overall palette.

Colours:

DNC101, DNC102, DNC103

Cool & Composed:

Silvered and greyed finishes for quieter contemporary interiors.

Colours:

DNC104, DNC107

Natural & Balanced:

A versatile oak tone that sits comfortably across modern and classic spaces.

Colours:

DNC105

Warm & Characterful:

Golden, honeyed and weathered finishes with greater warmth, movement and personality.

Colours:

DNC108, DNC109, DNC110, DNC111

Deep & Grounded:

A richer walnut-inspired tone for stronger contrast and atmosphere.

Colours:

DNC106

DNC101 — Sunlit Ivory Oak

Sunlit Ivory Oak carries pale ivory warmth through a softly weathered greige grain. In compact rooms it reflects light and opens the floor plane, across larger spaces, the subtle variation keeps the finish from feeling flat. It suits homes that want brightness with more material character than a clean whitewashed oak.

Tone:
Pale greige with ivory warmth

Light:
Bright with softly weathered movement

Pairs with:
Warm white, limestone, light ash, linen and muted sage

Sunlit Ivory Oak
DNC101

TAKE THE NEXT STEP

Fine grey beige variation gives the pale base more definition than a clean whitewashed oak.

DNC102 — White Smoke Oak

White Smoke Oak pares the colour back to a clean, softly smoked white oak. Fine grey grain becomes clearer in side light, while the pale base keeps connected rooms feeling open. It is at its best with simple architecture and measured contrast, where the floor can stay quiet without disappearing.

Tone:
Near white cool neutral oak
Light:
Very bright and clean

Pairs with:
Warm white, pale concrete, soft grey, black detailing and brushed metal

White Smoke Oak
DNC102

TAKE THE NEXT STEP

A near white base with fine smoke grey grain for the collection's cleanest expression.

DNC103 — Natural Birch Oak

Natural Birch Oak warms the lighter end of the palette with creamy blonde tones and low contrast grain. It softens bright rooms, sits easily beside warm whites and natural fibres, and brings a relaxed timber note without moving into a stronger golden oak. The effect is fresh, welcoming and easy to layer.

Tone:
Light creamy warm neutral

Light:
Fresh and welcoming

Pairs with:
Warm white, sage, light stone, rattan and natural wool

Natural Birch Oak
DNC103

TAKE THE NEXT STEP

Creamy blonde colour and low contrast grain create a soft, relaxed timber expression.

DNC104 — Silver Mist Grey

Silver Mist Grey lays a cool silver grey wash over a steady oak grain, giving the floor a clean architectural rhythm. Daylight lifts its softer side; lower light deepens the grey and gives the room more definition. It suits restrained interiors where the floor should organise the palette rather than compete with it.

Tone:
Cool silver grey oak

Light:
Balanced and composed

Pairs with:
Soft white, charcoal, concrete, black steel and muted blue green

Silver Mist Grey
DNC104

TAKE THE NEXT STEP

A restrained silver grey wash keeps the grain visible while simplifying the room around it.

DNC105 — Natural Oak

Natural Oak sits at the centre of the collection: warm, familiar and balanced between blonde, brown and taupe. The grain has enough movement to feel genuine without becoming rustic. Across open plan rooms it gives furniture and joinery a settled foundation, making it the easiest Natural colour to build a whole home palette around.

Tone:
Balanced warm natural oak

Light:
Adaptable and settled

Pairs with:
Warm white, limestone, olive, wool and walnut accents

Natural Oak
DNC105

TAKE THE NEXT STEP

A balanced oak tone with steady grain movement and broad interior versatility.

DNC106 — Walnut Ember Oak

Walnut Ember Oak brings the strongest depth in the range, with a walnut inspired brown base, smoked warmth and more pronounced grain contrast. Beneath pale walls and lighter upholstery it creates a richer, more intimate room. It works best where the floor is meant to add atmosphere rather than recede quietly into the background.

Tone:
Deep warm walnut brown

Light:
Grounded and intimate

Pairs with:
Cream, bronze, leather, warm stone and darker joinery

Walnut Ember Oak
DNC106

TAKE THE NEXT STEP

A walnut inspired brown base, smoked warmth and stronger grain contrast create a richer mood.

DNC107 — Moonlit Silver Oak

Moonlit Silver Oak is pale and silvered, but less polished than White Smoke or Silver Mist. Visible knots and weathered tonal shifts give it a relaxed, slightly coastal character. It reflects morning light softly and suits bedrooms, apartments and quieter living spaces that need brightness without a perfectly uniform finish.

Tone:
Pale silvered greige with weathered movement

Light:
Soft, airy and lightly varied

Pairs with:
Warm white, mist grey, pale ash, brushed nickel and muted blue

Moonlit Silver Oak
DNC107

TAKE THE NEXT STEP

Visible knots and weathered shifts give the pale silver base a more relaxed character.

DNC108 — Golden Oak

Golden Oak catches warmer light with a honeyed base, pronounced markings and a more established timber presence. It brings energy to kitchens, dining spaces and family rooms, especially beside cream joinery, stone and muted greens. The result feels sun warmed and characterful without relying on heavy traditional styling.

Tone:
Warm honey-gold oak

Light:
Luminous and inviting

Pairs with:
Cream, sage, terracotta, warm stone and aged brass

Golden Oak
DNC108

TAKE THE NEXT STEP

Honeyed warmth and stronger natural markings give the floor an established golden character.

DNC109 — Honey Maple Oak

Honey Maple Oak has a smoother, lighter grain and a soft peach gold warmth that lifts a room gently. It feels less rustic than Golden Oak and less neutral than Natural Birch, making it a friendly middle ground for family spaces. Pair it with oatmeal, warm whites and pale timbers for an easy, relaxed palette.

Tone:
Light peach gold maple warmth

Light:
Uplifting and relaxed

Pairs with:
Warm white, oatmeal, light timber, soft green and natural fabrics

Honey Maple Oak
DNC109

TAKE THE NEXT STEP

A smoother grain and gentle peach gold warmth give this finish a softer, friendlier mood.

DNC110 — Driftwood Oak

Driftwood Oak celebrates variation rather than hiding it. Lighter sections, deeper grain and pronounced knots create a weathered surface that changes across the floor, giving relaxed interiors more texture and individuality. It pairs naturally with plaster, rattan, aged metals and muted greens materials that welcome character rather than uniformity.

Tone:
Weathered warm neutral with varied depth

Light:
Organic and characterful

Pairs with:
Chalky white, textured plaster, rattan, aged bronze and muted green

Driftwood Oak
DNC110

TAKE THE NEXT STEP

Pronounced knots and tonal movement create the collection’s strongest weathered expression.

DNC111 — American Red Oak

American Red Oak has a fuller oak grain and a warm amber-red undertone that gives the floor more presence than Natural Oak without the darkness of Walnut Ember. It suits renovated character homes and modern heritage interiors, where deeper greens, brass, leather and warm white joinery can draw out its richer side.

Tone:
Warm amber oak with red brown depth

Light:
Characterful and grounded

Pairs with:
Warm white, deep green, brass, leather and heritage joinery

American Red Oak
DNC111

TAKE THE NEXT STEP

Amber red warmth and fuller grain give this décor a stronger traditional oak presence.

Considered on the surface.
Engineered underneath.

Deko Natural combines grain aligned EIR, 5S U-Guard, a 0.50 mm wear layer, carbon-infused SPC and attached IXPE in an 8.5 mm profile. The result is a more tactile timber visual, strong dimensional stability and a solid underfoot build suited to long term residential use.

Product type	Rigid SPC Hybrid Flooring
Plank dimensions	1540 × 230 mm
Total thickness	8.5 mm - 6.5 mm plank + 2 mm IXPE
Wear layer	0.50 mm
Surface texture	Embossed in Register - EIR
Surface coating	5S U-Guard Double UV Ceramic Coating
Core assembly	Carbon-Infused SPC Core
Attached underlay	2 mm IXPE
Pack quantity	5 planks
Box coverage	1.771 m²
Installation	Floating click-lock
Underfloor heating	Within the current Natural installation guide scope: maximum surface temperature 27°C
Slip resistance	R10
Fire classification	Bfl-s1
Residential warranty	50 Year Limited Residential Warranty
Commercial warranty	10 Year Limited Commercial Warranty

0.50 mm wear layer

Surface protection for regular residential and suitable commercial use.

R10 slip resistance

A recognised test result for clearer product comparison.

50-Year Limited Warranty

Residential coverage subject to current terms and eligibility.

- 5S U-Guard Double UV Ceramic Coating:**
A micron thin protective finish developed for high resistance to staining, fading, UV exposure and common everyday marks, while supporting easier routine cleaning.
- 0.50 mm Wear Layer:**
A transparent protective layer designed for regular residential and suitable commercial traffic.
- EIR HD Décor Film:**
High definition timber imagery with surface embossing aligned to the printed grain beneath.
- Carbon-Infused SPC Core:**
A dense engineered core designed to support structural confidence and dimensional stability.
- 2 mm IXPE Underlay:**
Attached cushioning that contributes to underfoot comfort and simplifies the floating floor build up.

- Mandatory technical notes:**
- Waterproof refers to the flooring construction. It does not make the installed floor a moisture barrier or flood proof system. Suitability depends on the substrate, room use, perimeter treatment and compliance with the current Deko installation guide and BPIR. Not intended for shower floors, constant ponding or flooding.
 - Limited warranty terms, eligibility requirements and exclusions apply. Builder and developer purchases are subject to separate coverage conditions. Refer to the current Deko Warranty & Maintenance Guide.
 - Specifications, colours, availability and supporting documents may be updated. Always refer to the current Deko product, installation, warranty and compliance documents at the time of specification, purchase and installation.
